

## Mercury Capital Announces New Vendor Finance Programs

To help get more approvals we have added several options for various credits, including start ups, to acquire financing. This Tiered approach will help approve more transactions and offer competitive pricing. The system is quick (automated) and simple (just a few lines on an application).

If you are nearby and can make time please stop by. If you are busy I would be happy to set up a time to come to your office and discuss these programs with you and your sales staff.

Mercury Capital HQ

### **Small/Micro Transactions - \$1,000 - \$20,000**

We are hungry to do more business and will not turn away even the smallest transactions. We have added more credit Tiers to these transactions that will allow a greater number of credits to get the best pricing available.

Start up companies, bad owner credit and other credit issues will be considered as long as the deal makes sense. We even have consumer financing available. We are in the business of writing contracts and will do everything we can to get the financing you need set up for your clients.

### **Transactions - \$20,000 - \$50,000**

We have broadened our credit window to allow more opportunities. Even start up restaurants will be considered as long as the owner's credit is worthwhile. With a large range of payment options we have the flexibility to offer the most competitive pricing available based on the customer's credit.

### **Transactions - \$50,000 - \$150,000**

We can still work off of the standard lease application for up to \$150,000 in equipment. However, if the customer wants to lower their payment he can include last years tax returns and financial statements. These transactions are the most price competitive without the stricter requirements of larger transactions.
